MI DAC

2024-2025

INTRODUCTION AND MOTIVATIONS

Some teams are winning more than others :Why ?

Key factors of a football club success

Data Analysis and predictions

OUR DATA

TOP 5
CHAMPIONSHIPS

MATCHES RESULTS
AND EVENTS

CLUBS DATA : PLAYERS
VALUE, AGE...

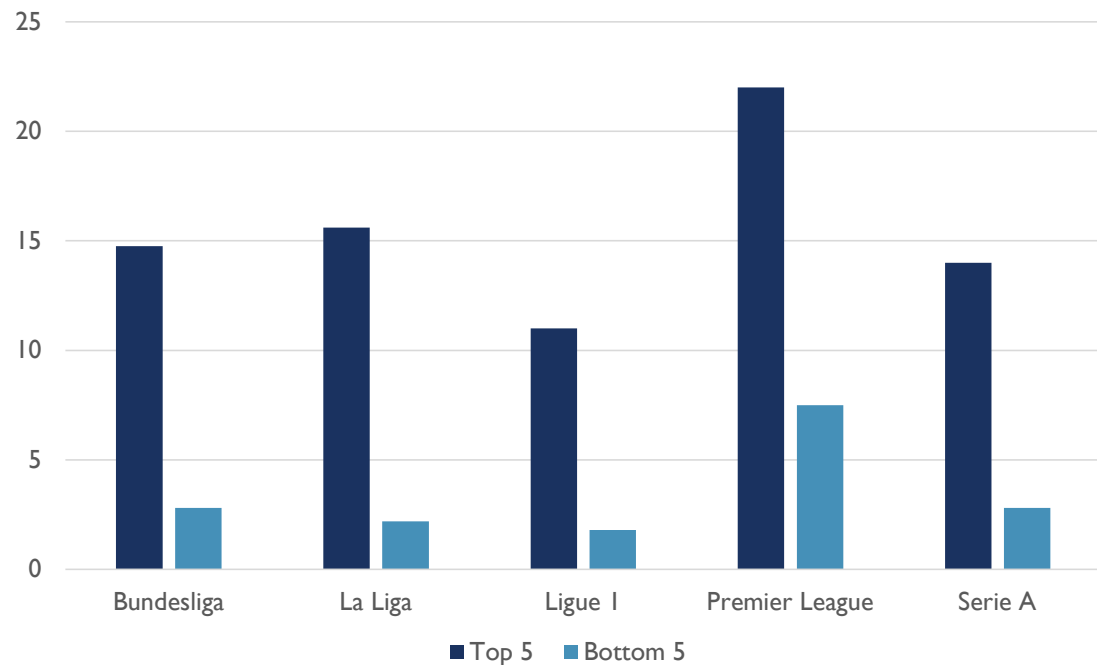

FOCUS ON 3 SEASONS
: FROM 2021 TO 2024

FIRST FEATURE : MARKET VALUE

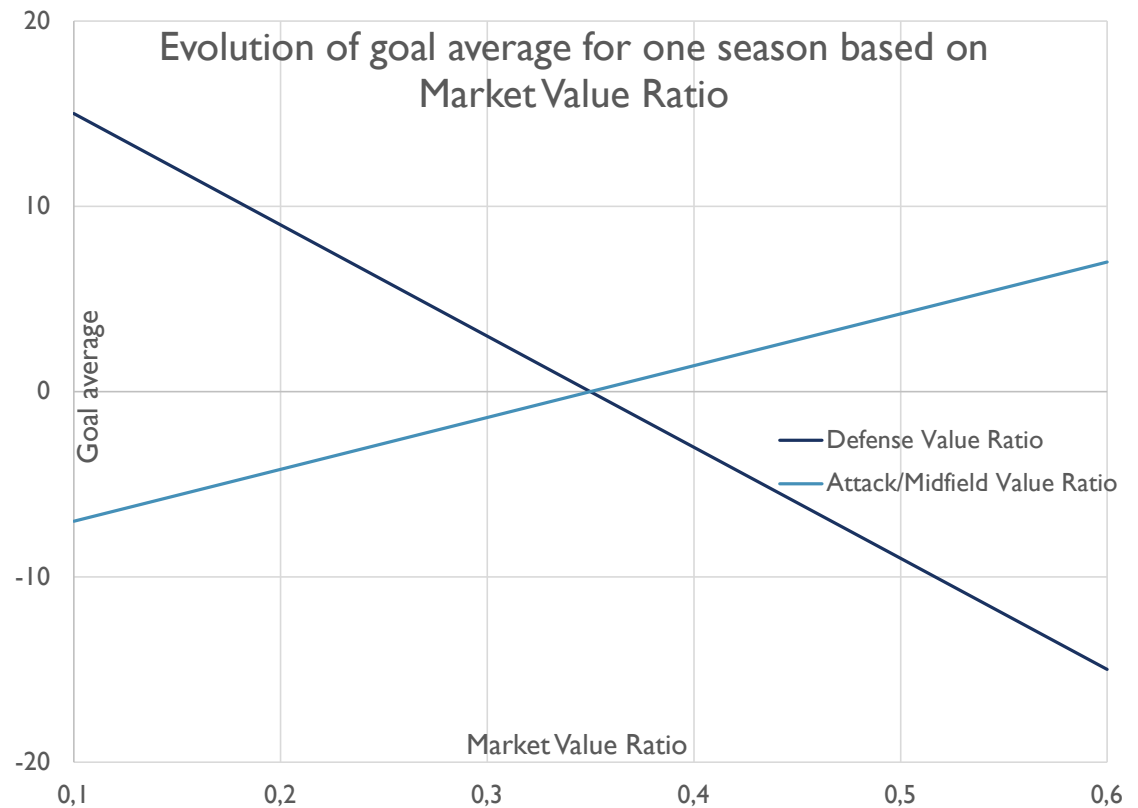

- Obvious but true : money creates victory
- For every championship, richest clubs finish higher
- But not a guarantee !

Average Team Value of Top and Bottom 5 for each league (2021-2023)

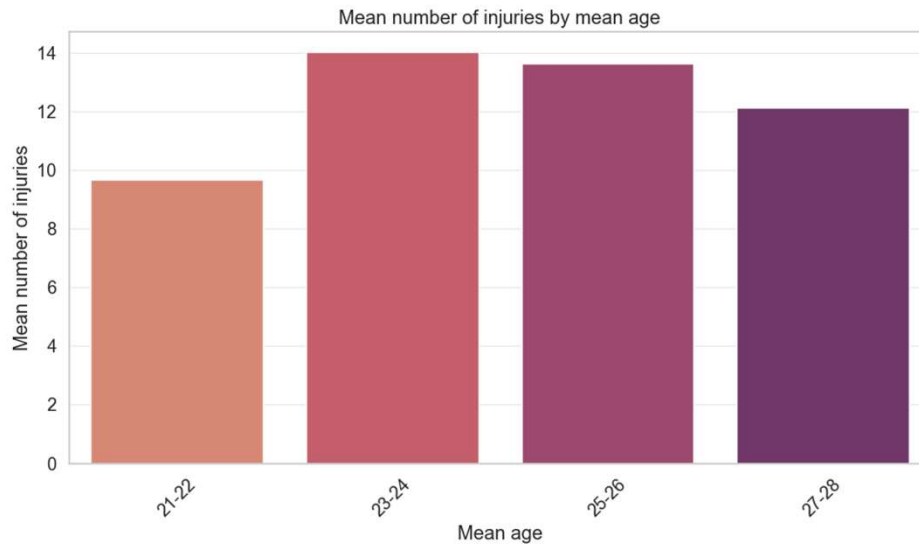

INVESTMENT IN DEFENSE : NOT A GREAT SOLUTION

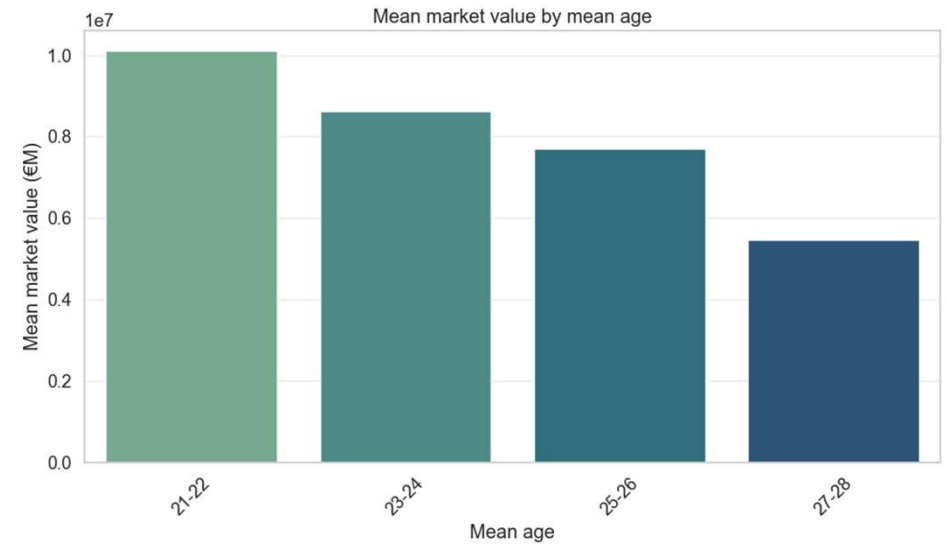

- If defense value higher than attack value : less goal scored
- Prioritize investments in attackers or midfielders
- Which kind of players should be bought ?

FOCUSING ON YOUNG PLAYERS : NOT THAT USEFUL

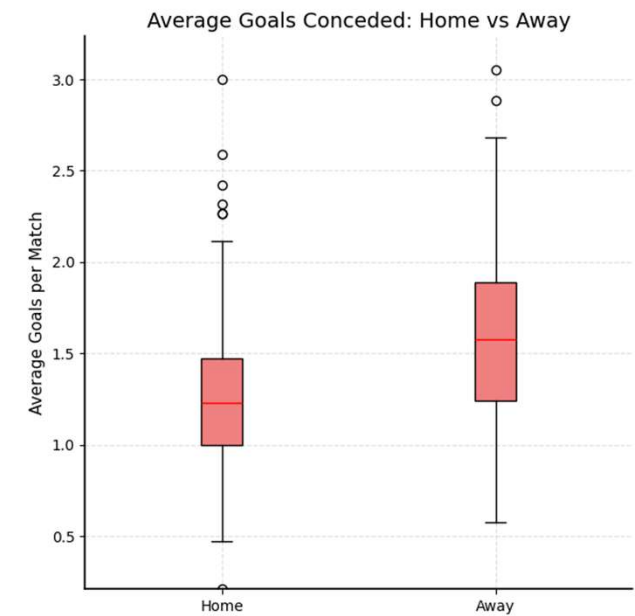

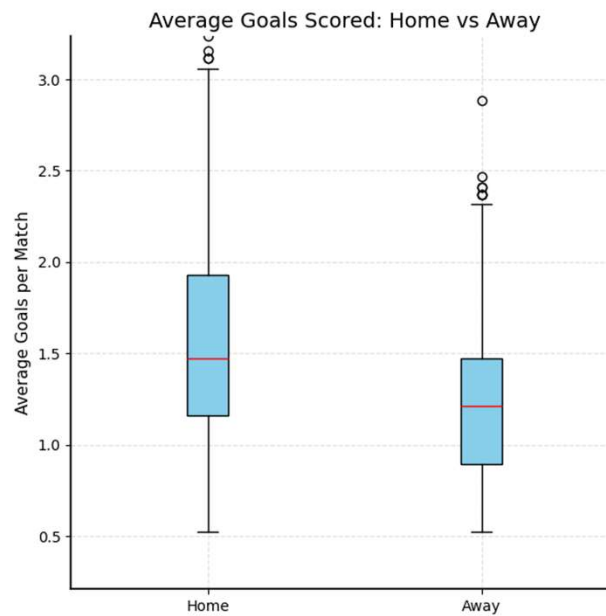

Young players are not particularly prone to injuries

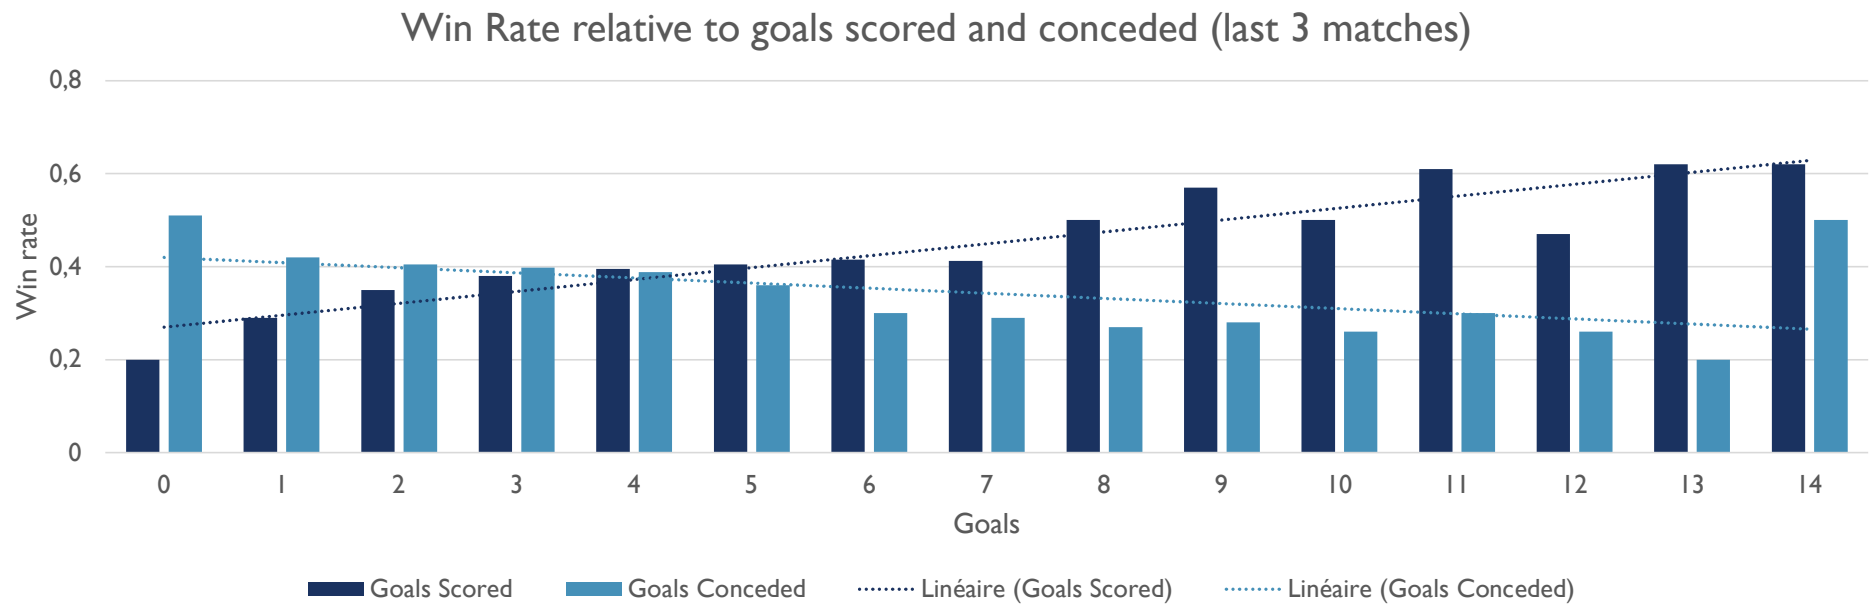

They also cost much more than the older ones

IS IT BETTER TO PLAY AT HOME ?

- Fast answer :YES !
- Home teams score more and conceded less
- Best teams win more on away match

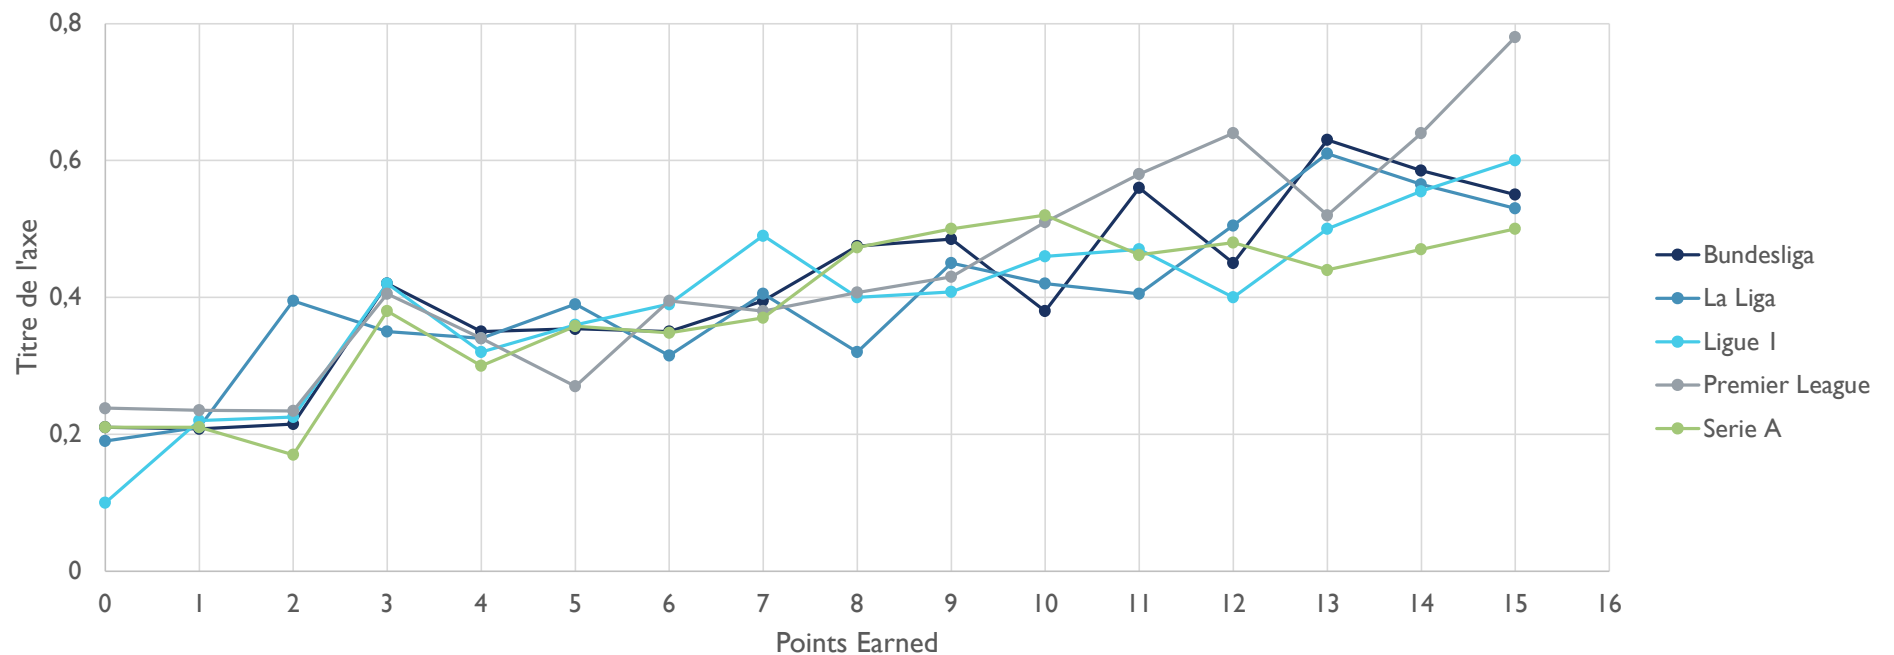

ONE OF THE MOST IMPORTANT FEATURE : TEAM FORM

SAME TENDANCY IN EACH LEAGUE

Win rate based on the general form for each league (5 last matches)

OUR PREDICTIONS

ACCURACY OF WINNING
PREDICTION : 72 %

DATA EXPLAINED BY OUR
FEATURES : TEAM FORM, MARKET
VALUES ON EACH POSITION

MOST IMPORTANT VARIABLE :
CLEAN SHEET POTENTIAL

CONCLUSION

- Main features explaining a win :
Market Value, Team form and
Clean Sheet Potential
- To improve your results : invest
on attacking players, less in
defence
- There is a great part of
uncertainty : that's what makes
it beautiful !
